## NOTES OF INTEREST OF BUSY KINSALLA

Mr. D. Corbett was a visitor in Edmonton last week.

Miss Sterling and Mr. Sheppy attended the teachers' convention at Irma on Saturday.

Miss Lucile Mark has accepted a position with Mrs. Wade at Jarow.

Mrs. W. L. Ferries entertained at a party on Tuesday evening. Those present were Mrs. Garvie, Miss Isobel McKie, Miss Jean Bowden, Miss Evelyn York, Miss Dorothy Williams, Mr. Sheppy, Jack Corbett, Andrew Miller and Jack McKie.

Miss Pattie Stronach who is attending school at Wainwright, spent the week-end at her home here.

Mr. A. Third spent Monday in Edmonton.

Mrs. Long has returned home from Edmonton, where she has been in the hospital for several weeks.

Mr. R. Eaton left on Sunday for Kelcey, where he will relieve the pumpman for a few weeks.

Mr. Harry Podd, of Edmonton, was at the home of Mr. and Mrs. R. L. Eaton on Wednesday evening.

Mrs. E. R. Horinek, Mrs. W. Kerns, Mr. W. Beahel and Mr. H. Pyke are patients at the Viking hospital.

Babe Ruth ended the season and his career as a regular on the diamond. For his "swan song" a great crowd turned out and gave him a reception that any king would thrill over. This year no king threatened to take the crown from the glamorous "Babe". His mark of 60 homers looks safe in comparison with 49 for "Iron Man" Gehrig. Yet with the new "rabbit ball" of 1934, there was 300 more home runs than in 1933, in the two big leagues.

Wilma Currie, Albert, 4th; Mollie Jackman, Alma Mater, 5th. (7 entries)

Woven Darning—Borghild Bruhaug, Batts, 1st; Evelyn McRoberts, Albert, 2nd; Wilma Currie, Albert, 3rd; Kathleen Barrs, Albert, 4th; Gwen Burton, Alma Mater, 5th.

Samples—Brubel Bruhaug, Batts, 1st; Evelyn McRoberts, Albert, 2nd; Gwen Burton, Alma Mater, 3rd.

Hemstitched Towel—Kathleen Barr, Albert, 1st; Gwen Burton, Alma Mater, 2nd; Evelyn McRoberts, Albert, 3rd.

Bed Room Set—Kathleen Barrs, Albert, 1st; Evelyn McRoberts, Albert, 2nd; Gwen Burton, Alma Mater, 3rd; Borghild Bruhaug, Batts, 4th.

Knitting, open to all ages, Mittens—Kathleen Barrs, Albert, 1st; Winnifred Wright, Albert, 2nd.

Thrift Problem No. 82—Evelyn McRoberts, Albert, 1st; Gladys Geeson, Irma, 2nd; Mina Currie, Albert, 3rd; Dorothy Currie, Albert, 4th; Marion Higginson, Irma, 5th.

Thrift Problem No. 83—Borghild Bruhaug, Batts, 1st; Jean Whidden, Batts, 2nd; Evelyn McRoberts, Albert, 3rd; Edna Jones, Albert, 4th; Mina Currie, Albert, 5th.

Thrift Problem No. 84—Borghild Bruhaug, Batts, 1st; Wilma Currie, Albert, 2nd; Edna Jones, Albert, 3rd; Dorothy Geeson, Irma, 4th; Kathleen Barrs, Albert, 5th.

Elementary Science, Art, Penmanship, Composition and Geography next week.

At a meeting held Saturday night the following prize schedules were decided upon: Live Stock—2.75 1st, 2.25 2nd, 1.75 3rd, 1.25 4th, 75c 5th; Poultry—60c, 50c, 40c, 30c, 25c; All school work—45c, 35c, 25c, 15c, 10c.

Wm. Matthews' prize for highest points won by all scholars goes to Jean Whidden, Batts, 88, and Evelyn McRoberts, Albert, 2nd, with 57.

## NEWS ITEMS FROM JAROW

Mrs. M. Morrill, of Calgary, who has been visiting her son, Mr. H. Barton, returned to her home Saturday, September 22nd.

Mr. and Mrs. Richard Marby motored to Tomkins, Sask., to visit Mrs. Marby's parents. They returned home last Monday.

Mr. and Mrs. O. R. Marby were visitors in Jarow for a few days recently. They returned to their home in Melville, Sask., Monday, September 24th. Their daughter, Veda Marby, accompanied them.

The United Church Ladies Aid met at the home of Mrs. A. Christianson on Wednesday. Arrangements were made for the annual chicken supper which is to be held on October 26th.

Daily Day service was held in the United Church last Sunday. The program was given by the Sunday school children, at the close of which an address was given on the importance of religious training in the home as well as in the Sunday school.

Mrs. Peat is visiting her sister who lives south of Irma.

Threshing is greatly delayed on account of unfavorable weather.

There must have been great attraction in Viking last Monday for several of our men motored there.

Four weeks ago an article was written on the Jarow town well and sent to the "Times". Unfortunately the editor inserted the article among the Irma news. The criticism was not about the Irma town well, but our own well at Jarow.

## News From The Capital By T. B. Windross

Edmonton, Alta., Oct. 2.—Aerial operations along the northern lines are nearing the season's end. It is anticipated here that only a few more flights will be possible to northern points before the "ice-jugglers" season sets in. Most of the machines in the Northern Territories have been able to reach the home airport at McMurray in the last week.

Federal radio inspectors in their report, issued here this week, state that more than a third of the radio fans in the province reside in Edmonton. Of the \$1,016,836 paid into the federal treasury for radio licenses, during the five months ending August 31, \$52,220 was contributed by Albertans and \$18,821 by Edmontonians, the reports show.

While officers investigated the possibility of their having been connected with the \$8,500 Hairy Hill bank robbery, four Vegreville district men were in the police cells here Saturday. Three of the men are awaiting trial for retaining stolen property from a farm in the district. The fourth is held on a vagrancy charge. No new developments were reported by the police.

Barefooted and dressed in flour sacks and gunny-sacking, four boys and a girl, the eldest 10 years old, were driven to Rimby, by their mother this week, in an old two-wheeled gig, and turned over to the R.C.M.P. officers there to keep them from starvation. The family had lived in a one-roomed shack fifty miles from Rimby and in a district that was not an organized municipality. The poor mother said they could not get relief for that reason, and she could not stand seeing them suffer during the coming winter, so she fought her battle against the loss of her children and brought them in to the police.

They are now in the Children's Aid shelter, Edmonton, and having the time of their lives. During most of the fine weather they were compelled to run around without clothing. All of them are bright, cheerful, healthy children, but their mother turned her horse back in the direction of the wilderness, on her way back to the one-roomed shack where she has been compelled by poverty and the depression to live in suffering and hardship, and now without her five bright bairns.

Back some months ago the talkative "Dixie" Dean claimed he and his brother would win 50 games during the season. Sure, everybody gave him the "Bronx Cheer". The amazing thing is that they actually did 49, Dixie doing 30 and Duffy 19. That's calling your shot.

## TEACHERS' ALLIANCE CONVENES AT IRMA

A very enjoyable afternoon and evening were spent by the teachers of the Alberta Teachers' Alliance at Irma, in Hedley's Hall on September 29th. This included all teachers between Chauvin and Kinsella. Forty-two teachers were present.

The meeting opened at 3.30 with the president, Mr. Smith, of Chauvin, in the chair, assisted by Mr. Martin, vice-president, of Irma, and Mr. Thorsen, secretary, of Wainwright. Mr. Smith and Mr. Martin welcomed the teachers and Mr. Martin gave a brief outline of the programme to be followed for the day.

Mr. Good, Inspector of schools from Wainwright, was present and gave a short address.

Mr. Meade, of Wainwright, also addressed the teachers for a few minutes, using as his topic "A.T.A."

These speeches were followed by a general discussion.

A business meeting followed during which time it was decided to have the next general meeting at Wainwright on October 27th.

Recess was declared until six o'clock when everyone repaired to the basement of Hedley's Hall where a wonderfully prepared and palatable chicken supper was served by the Irma Women's Institute.

At seven o'clock all moved upstairs where whist was played until 8.30. Mr. Richardson, of Chauvin, winning the gents' prize, while Miss Spencer won the ladies'. During this time Mr. "Tommy" McLean entertained in his usual capable manner by giving two numbers. A contest was next conducted in which Mr. Richardson and Miss McGregor won the prize.

Cards being finished, dancing commenced at nine o'clock and lasted until 11. The music was supplied by Mr. McLean.

All present enjoyed themselves to the limit and congratulations are due the Irma local A.T.A. who so successfully carried out the day's program.

## Alberta Buys Six New Cars For Ministers

Six new automobiles—and not of the inexpensive variety—have been purchased by the Alberta government recently for the exclusive and personal use of cabinet ministers, investigation revealed Wednesday.

The average value of the new cars is more than \$1,400. These are of the same manufacture and type, manufactured in the United States and assembled in Canada; two are of another kind, produced principally in Canada; and the remaining one is of a brand produced entirely in the United States.

Alberta cabinet ministers' seeming need of new automobiles comes hard on the heels of the clean-up in government cars instituted by Premier Heppburn of Ontario. In a campaign to reduce governmental expenditures, Premier Heppburn decreed that all government-owned automobiles being used by cabinet ministers and high executive officials should be given up, and then he staged in Toronto a huge high-powered auction sale in which half the government's cars were sold.

This move, it has been estimated,

realized close to \$40,000 in cash and will result in a saving of at least \$100,000 in operating expenses annually, all to be deducted from public assessments.

Alberta's ministers, however, continue to enjoy the luxury of government-owned automobiles placed at their personal disposal and maintained at government cost. The only cabinet member who has not been provided with a car by a beneficent province, is Hon. Irene Parry, minister without portfolio. This lack of gallantry has not been explained.

Premier Reid himself heads the list of beneficiaries through the purchase of new cars. He chose a comfortable model of the brand which a few weeks ago did 103 miles an hour in a speed test on Portage ave. The same kind of car proved the favorite of Hon. J. J. McLean, now minister of public works, and Hon. George Hoadley, minister of public health.

The type of car sells for about \$1,500. Hon. J. Russell Love, provincial treasurer, picked an all-American car for himself. The type is valued at approximately \$1,400 in Edmonton.

Is This Real Sport?

The international yacht race for the America Cup between the British challenger "Endeavour" and the United States defender "Rainbow" is the subject of innumerable newspaper and magazine articles reviewing the history of this famous cup and setting forth facts and figures indicating the vast expenditure of money and effort on the part of the multi-millionaires who alone can afford to indulge in this sport. This yacht race is not a money-making venture on the part of those who engage in it; quite the reverse. No gate admission can be charged, and the spectacle is free to all those who can get within sight of it.

But the cost of building even one of these yachts and financing it during the trial races and the short race period runs well over a million dollars, and with several boats involved, the actual total cost is staggering. Is it all worth while? Are such huge expenditures of money for such a purpose justified at any time, and particularly so at this time when millions of people in the two countries concerned are in need of the bare necessities of life? Are those who devote their wealth to such a purpose real sports, and are they making any actual contribution to the well-being of their fellow-men?

What is real sport? What is, or should be, its aim and object? Real sport, if we understand it aright, should provide recreation from the everyday toils and worries of life, and it should, therefore, be engaged in, not by a select few, but by the masses. Secondly, its aim should be the development of the physical well-being of all who engage in it, coupled with the inculcation and development of those traits of character which recognize and insist upon fair play, respect for a competitor, observance of the rules of the game whatever it may be, acceptance of defeat with good grace and a smile, and of victory with a becoming modesty.

If this is a correct definition of real sport, then it should never become a mere money-making enterprise in any of its branches. As a matter of fact, when it develops into a money-making enterprise it ceases to be sport in its true sense and becomes a business with gate receipts and salaries the main objective, while all the principles underlying real sport are sacrificed to skill.

Unfortunately, much of the so-called sport of to-day has degenerated from the ideal of amateurism to professionalism; from love of the game to love of the dollars that may be earned. It is no longer sport or recreation, but a cold, competitive business.

This has long been true of baseball in the United States. Tens of thousands of people pack the stands to watch eighteen highly trained experts "play" ball. These thousands cheer themselves hoarse for the "home" team, although not one of the "players" may be a native son or even a resident of the home city; but imported men from anywhere simply because they have the knack to excel in a certain position on the baseball diamond. Such is the great national game of the United States; but it is not sport. It is nothing but a business highly organized to the nth degree to make money for the owners of the franchise and their high-salaried ball-playing employees. Instead of the thousands of spectators being benefited physically or otherwise, the reverse is true; they ought to be actively participating during these leisure hours in some health giving recreation.

In its heyday, lacrosse, the old national game of Canada, was an amateur sport. Thousands of boys engaged in it for the love of the game and the exercise they obtained. Professionalism crept in, and Canada's national game died. Canada's great winter game, ice-hockey, is travelling the same road, thanks to the adoption of the game by the United States and the invasion of the so-called sport magnates with their offers of large salaries to expert hockey players. Professionalism makes inroads into football, golf, tennis. Only a few games, curling, for instance, remain free of the taint.

What and who are responsible for this deterioration? First, the money grabbing instinct of men. Secondly, universities and colleges to a considerable extent. Large universities pay extravagant salaries to so-called sports managers and trainers, not for the purpose of developing the physical well-being of all members of their student bodies, but to build up a championship crew or team in the varied departments of sport to carry the college colors to victory and thus advertise the university and command the admiration and ultimate enrolment of youth from all over the country. It is no longer sport in its true sense, but a business proposition with such institutions.

With but few exceptions, people love sports. Practically every child likes to play games. It is a natural born instinct, and it has its place, and a big place, in the physical, mental and moral development of youth. But it is being perverted to gross material ends, with the result that sport in its real sense is largely lacking in the larger centres of population, and we must go to the small towns, villages and rural communities to find games and sporting events engaged in by the masses for the intrinsic love and joy of the game. Sport in its true sense and meaning should be strongly encouraged everywhere, but it is a time halt was called to professionalism in sport, and to its twin evil of making proficiency in any one branch of it the end-all of one's existence.

## Use Ultra-Violet Rays

Planes Equipped For Toning Up Dials On Instrument Board

Ultra-violet rays have become standard equipment on aeroplanes engaged in night flying.

Pilots found that the radium dials of the instruments and gauges became dull unless radio-activity in them was stimulated occasionally. So ultra-violet rays boxes were installed. The boxes, not much larger than safety match holders, are fastened to the steering post arms in the planes. Since ultra-violet rays are invisible there is no reflection against the windshield when the pilots use them.

## Monkeys Have Gone Nazi

Animals In London Zoo Give Salute To Visitors

A special cable from London to the New York Herald Tribune says the monkeys of Regent Park zoo have gone Nazi.

In a recent week, it appears, a German visitor to London taught Jim, my, of the zoo's chimpanzees, to give the Nazi salute in return for bananas. Other Simians promptly imitated him, and to-day the entire monkey house was enthusiastically giving the "Heil Hitler" with upraised paws whenever visitors arrived.

## Looseness Of the Bowels During the Summer Months

It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels. Generally it develops into Diarrhoea, Dysentery or Summer Complaint, and has a tendency to weaken the system.

Do not check the discharges too suddenly. Do not experiment with a new and untried remedy, but take Dr. Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 35 years.

Do not accept a substitute. Be sure and get "Dr. Fowler's" when you ask for it. Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

## Prince Assisted Miners

Waived Royalties Until Mine On Estate Was Self-Supporting

The Prince of Wales went down a Somerset coal mine that came to life close to the spot where a coal mine had died.

There is a human story behind this "new coal field for an old one." The prince heard it from one of the doughty West of England colliers who conducted him round the mine.

Thirteen years ago a coal mine at Farrington Gurney closed down. Three hundred men were thrown out of work. They were idle and forced to go on the "dole".

Three years later, determined to make work for themselves, a small band of them applied to the Prince of Wales for a concession to dig close to the dead coal field.

The prince lent a sympathetic ear to the colliers' plea. He told the men the duchy would waive any royalties until the mine was self-supporting.

The men set to work. After deep excavating they struck coal. Every now and again the prince inquired how the mine was working.

Now the mine is paying for itself. Fifty men are in full-time employment, one hundred and thirty-five tons of household coal are raised every week. And the Duchy of Cornwall is receiving its dues.

The prince received a royal welcome from the black-faced colliers.

Then he disappeared half a mile under the ground for a quarter of an hour and watched the men dig for coal. He reappeared, his hands black from the low corridors where he had bent almost double.

## DOUBLED UP WITH RHEUMATISM

Could Not Wash Himself Nor Brush His Hair

So bad was his rheumatism that his friends declared he would never work again. Although he is 70 years old, he proved they were wrong.

Read what he says: "I am seventy years of age. Last Christmas I was completely doubled up with rheumatism. I could not brush my hair nor wash myself. People said I should never work any more. I am working harder than a young man to-day. Thanks, many thanks, to Kruschen Salts. I take them in my tea, and I have recommended them to many. I could not get in or out of bed myself, nor sit up. But see my work now—12 hours a day sometimes. Kruschen Salts have done it."

Rheumatic conditions are the result of an excess of uric acid in the body. Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals. Other ingredients assist Nature to expel these dissolved wastes through the natural channels. In addition, there are still other salts in Kruschen which prevent food fermentation in the intestines, and thereby check the further accumulation not only of uric acid, but of other body poisons which undermine the health.

## Preparing For Trip

Duke Of Gloucester Studied Books On Australia

A tall, fresh-complexioned, well-tailored young man in brown soft hat and brown shoes was exploring an Oxford-street book shop in a recent week.

He had found his way to a large collection of books, some old but most of them recent, dealing with every phase of life in the British Empire. From the way he went about the collection, with one of the assistants, studying maps and pictures of certain countries, it was clear that he was either a student or a traveller preparing to go on a long voyage—or both. As a matter of fact he was both. It was the Duke of Gloucester. Evidently he was making a careful selection of books to prepare himself for the long journey to Australia.

In the three Prairie Provinces on August 10, 1934, the estimated average showed a decrease of 1,881,000 acres, or 7.5 per cent. in wheat; a decrease of 70,000 acres or 2.3 per cent. in barley; and a decrease in flaxseed of 17,500 acres, or 7.4 per cent. Oats increased by 170,000 acres or 1.9 per cent., and rye also increased by 149,300 acres, or 28.7 per cent.

## Difficult To Replace

Substitution of other forms of revenue for the tariff as a source of national income would be difficult in Canada, Hon. George H. Sedgewick, chairman of Canada's tariff board, declared before the maritime conference on Canadian affairs held at Halifax.

A tax of about 10 cents a gallon is levied on gasoline in England.

## Air Survey Reveals Ruins

Ancient Earthworks Sunken For Centuries Were Invisible From Ground

A moundbuilders' ceremonial chapel and an ancient roadway, approximately two and one-half miles long, were discovered for the first time near Newark, Ohio following completion of an aerial survey by Captain A. W. Stevens, intrepid army photographer and participant in the recent ill-fated attempt to invade the stratosphere.

The discovery was made by Dr. Henry C. Shetrone, archaeologist and director of the Ohio State Museum while examining air photographs taken by Capt. Stevens at museum offices in Columbus, Ohio.

Invisible from the ground, these once mighty ancient earthworks, believed constructed by Hopewell Indians, have lain sunken for centuries unnoticed by residents of this vicinity.

The roadway, which is 150 feet wide, is of perfect geometric proportions and indicates that people of the Hopewell era had some knowledge of that mathematical science, museum officials believe.

A keyhole-shaped figure on the air photo, the chapel, which lies at the road's southwest termination, is approximately 200 feet in diameter at its circular part and is believed to have been a ceremonial oracle of the Hopewell tribes.

Located between two perfectly proportioned circular Indian mounds southwest of the city, the territory in which the new discoveries were made has long been a mecca for archaeologists and tourists.

Tunnels and elaborate underground burial rooms similar to those found in the world famous Ogden Mounds near Lewistown, Ill., also products of Hopewell culture, might be found as a result of the new discovery Shetrone believes.

First research of the Newark Indian burial grounds was made in 1848 by Squire and Davis, early archaeologists who explored Ohio and the Middle West.

Although they indicated the beginning of the roadway in maps filed with the Smithsonian Institute in Washington, no further trace of the earthworks had been discovered until the air exploration by Captain Stevens, museum officials say.

## When Duties Are Divided

Work Is Very Seldom Done As It Should Be

Affairs at the French ministry of finance, where the windows are never clean because, as someone has just discovered, the ministry of finance is responsible for the inside and the ministry of fine arts for the outside, and the two ministries never arrange to clean both sides at once, had an almost exact parallel nearer home in early Victorian days. When the prince consort began inquiring into arrangements at Buckingham Palace, which he found far from satisfactory, he was informed that the lord chamberlain had charge of all the interior rooms except the kitchens and pantries, which were under the lord steward, while the exterior came under the office of woods and forests, and that they likewise failed to synchronize in cleaning the windows. On demanding why there was never a fire in the dining room, he was told "the lord chamberlain lays the fire, and the lord steward lights it." As the underlings of those two great officers were in disagreement the queen was left to dine in the cold—Manchester Guardian.

## Need Coin-Container

Philatelists Sending Money Through Mail Use Variety Of "Stickum"

A crew of 15 postal clerks at Yellowstone Park, Wyoming, which handled the 90,000 requests for first-day covers on the new Yellowstone stamp issued recently, wonder why someone has not invented a special coin-container for philatelists.

Collectors sending in five, ten, twenty-five, and fifty-cent pieces used every conceivable method in making the cash enclosures with the envelopes which they wanted to carry the new stamp as well as the cancellation mark from the Yellowstone post-office on the first-day covers. Tar, adhesive tape, molasses, wax, honey, chewing gum and syrup were among the varieties of "stickum" employed.

The clerks all exhibited sore thumbs and fingers from ligging for the well-protected cash.

## Cook's Home Rebuilt In Australian Park

Even Ivy Taken To Melbourne With Explorer's Cottage

Packed in 253 boxes and transported by 35 lorries, Captain Cook's cottage was taken through the streets of Melbourne, Australia, on its arrival by the steamer to the Fitzroy Gardens, where it is to be re-erected in connection with the centenary celebrations.

Everything about the Yorkshire cottage has been preserved with amazing thoroughness, even to the creak on the staircase, as one wit remarked. Stones for the walls gashed for the floor, joists rafters and beams have all been marked and numbered.

A bag has been forwarded containing the original mortar which held brick and stone together, also a bag of nails which will not be much use for hammering in, but interesting as showing the type used.

The ivy alone will not be replaced in its original state. The quarantine authorities demand that it be fumigated, as a potential bearer of diseases. In exchange for the cottage, Cook's birthplace, Great Ayton, York, is to possess a stone obelisk modelled on the monument commemorating his discovery at Cape Everard.

Fall rye in Canada, as at August 10, 1934, shows a yield of 5,239,000 bushels from 587,100 acres, compared with 3,454,000 bushels from 434,900 acres in 1933.

Of 35,500 insured workers in Luton, England, only 700 are out of work.

## Lignite Coal

Development Of Coal Field In Saskatchewan Carried On Successfully

Development of high moisture lignite deposits in southern Saskatchewan, which are located a considerable distance to the east of other fuel sources of Western Canada, has been carried on successfully throughout the depression years. R. L. Sutherland, consulting engineer for the Saskatchewan Coal Operators' Association, told the western meeting of the Canadian Institute of Mining and Metallurgy at Calgary.

"The increase in production in the Saskatchewan field and use in recent years when the general trend of production has been downward," he said, "has been due in part to economic conditions and in part to improved preparation at the mines."

The more densely populated sections of Saskatchewan and Manitoba, he said, offered a wide market for the southern Saskatchewan fuel.

Roman coins were minted in the temple of Juno.

## Even Rheumatic Pains Eased Fast Now!

BAD HEADACHES, NEURITIS PAINS OFTEN RELIEVED IN MINUTES THIS WAY

Remember the pictures below when you want fast relief from pain. Demand and get the method doctors prescribe—Aspirin.

Millions have found that Aspirin eases even a bad headache, neuritis or rheumatic pain often in a few minutes.

In the stomach as in the glass here, an Aspirin tablet starts to dissolve, or disintegrate, almost the instant it touches moisture. The instant "taking hold" of your pain

practically as soon as you swallow it. Equally important, Aspirin is safe. For scientific tests show this: Aspirin does not harm the heart.

Remember these two points: Aspirin Speed and Aspirin Safety. And, see that you get ASPIRIN. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet.

Get tin of 12 tablets or economical bottle of 24 or 100 at any druggist's.

## THE TENDERFOOT

By GEORGE B. RODNEY  
Author of "The Coronado Trail", "The Canyon Trail", Etc.

### SYNOPSIS

"You've fallen here to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

(Now Go On With The Story)

### CHAPTER I.—Continued

"What seems to be the trouble?" Keene's tone was anxious.

"Exactly what I asked old Ben. He said that as far as he can see there are two reasons; Carr is mighty old fashioned . . . and the Broken Spur is next to 'em."

"Well, what of it? These days some one's got to be next door."

"Huh. You're damned innocent for the man I know you to be. I suppose you never heard of rustle?"

"That's archaic," said Keene sharply. "Men don't rustle these days."

"Think so? Wait a bit! Old man Carr is always short of cash. He has to hire his men just for the time he needs 'em. He's got only about four or five men permanently on his payroll."

"That means that poverty keeps him from building up a bunch of waddies he could count on to charge hell with a cup of water if the Hour-glass needed it. He's honest, too, and that's a handicap when he lives next to the Broken Spur. For years Dustin and Goddard have been tryin' to, by a lawsuit, to get the water supply that makes the Hour-glass valuable. Can't you see what happens?"

"Old man Carr, crippled, is being robbed deaf, dumb and blind to make him sell his place."

"But he can only sell his share. Half of the place is mine."

"Well then . . . Stone hauled himself erect in his chair. "It looks to me as if one Gerald Keene, before long, will find himself partner to two crooks. If old man Carr is right. Don't you see? Old man Carr will have to sell his half of the Hour-glass to these men Dustin and Goddard to stand square with the world."

"Does your friend Lynn say these men Dustin and Goddard are two crooks?"

"He didn't have to say so. He said he couldn't understand 'em. Old Ben is so straight that the only man he doesn't understand is a crook. Why?"

"Well . . . I told old man Burwell I was going to run down to the Hour-

glass and have a look at the place. If I go as the half-owner I'll learn exactly nothing if there's any crooked work goin' on. I'm thinkin' it'll be best for me to go down there with a letter of introduction from Gerald Keene, the half-owner of the Hour-glass, to old man Carr. To get me a job down there and see for myself what's goin' on."

"Huh. Gerald Keene'll learn nothing, but good on Gerald Keene's ranch," said Stone grimly.

"That's so. I can't go to the Broken Spur because if Dustin and Goddard are really crooked, they'll not be hirin' any strangers on the ranch. If things are as crooked as men say the Hour-glass'll be the place to learn about it. My plan's the best. I'll go down there with a letter from Gerald Keene and you say here till you hear from me. I'll get me a job."

"Huh! What kind of a job! A qualified cowpuncher'll be under suspicion the minute he hits the place. Why would a qualified workman take on with a busted ranch when there are others better able to pay him what he's worth? You can't get a job."

Keene slapped him on the shoulder. "You're on. I can't. But I'll go as a tenderfoot. I'll take a letter of introduction to old man Carr. I'll be Duro Stone lookin' for a job to learn the cow business. You know every druggist in the East is turnin' out amateur cow-punchers. I'll be one."

Stone laughed in spite of himself. "I know the type. Druggist cow-punchers! Nickel plated gun and bearskin chaps! Bought straight from Montgomery-Ward. Shucks, man! You can't do it. You can't fool anybody who's ever forked a cayuse. Your walk; your color; the way you ride. . . . Nothin' doin'."

"I'll show you. Let me at that telephone till I order some stuff."

In five minutes he had sent an order crackling across the wire. "To be delivered in twenty minutes sharp," he said.

In a half-hour it was there and a grinning boy pounced the receipt. Keene thrust the boy into the hall, untied the package and turned to Stone.

"You damned old Doubting Thomas," he said. "I'll show you! Wait."

He was gone like a whirlwind. A half-hour later the inner door opened and a new figure stood in the doorway. Newness overlay all his garments. His stitched boots wrinkled about the ankles and his red-and-green shirt fairly crackled in its creases. His white goatskin chaps had evidently been combed and newly brushed and a nickel-plated six gun showed three freshly filed cuts across its butt; whereas both men laughed mightily. Stone roared with laughter and Keene raised himself on his toes and studied his reflection in the long glass.

"The Duro Stone," he said. "I'm goin' down to the Hour-glass to get me a job tuckin' cows and calves into that little beds. I'm goin' to learn all there is to be learned about cows an' their ways. I'm not Gerald Keene. I'm Duro Stone who used to sell papers on the Rock Island route. I always did want to be a cow-puncher. Will I do?"

"God knows what you'll do," quoth Stone between grins. "But if you find out what the trouble is at the

Hour-glass or the Broken Spur, you wire for one Gerald Keene. That's me. I'll help you chase the fen off the nest."

"Wait. . . . Keene came back from the closet with a bottle and glasses. "Here's the health of Keene an' Stone. . . . I'll wire if I need you."

"And when I hear," said Duro Stone, left behind, "I'll sure come a-runnin'."

"You may need to," said Keene soberly. "I hope not but I'm afraid."

"All right, Old Timer. To the health of the new Duro Stone."

### CHAPTER II.

"There he comes now! That's old Dad Kane as sure as shootin' . . ."

Sam Dustin, half-owner of the Broken Spur ranch, jerked a finger to the west and Spike Goddard, his partner, rose slowly and squinted into the dust-haze of the range.

"You're a damned fool ever to have grubstaked that old fool Dad Kane," he said explosively. "It's all your doin', too. Three hundred dollars plumb throw'd away."

His words carried a sting. They were meant to do just that. Everything that Spike Goddard said or did carried a sting. His red face; his cold blue eyes, his wire-stiff reddish beard all bespeak combativeness and Dustin felt that sting. He knew that silence under the whip-lash of his tongue would annoy Spike more than any speech.

Dustin and Goddard had owned the Broken Spur for several years and all Crevasse County wondered how they made it pay. That they did make money was clear but none knew how they did it. Old Sam Peters, the decrepit old cashier at the only bank in Seco, could have told them but there were good reasons why Peters should tell nothing that affected Sam Dustin.

"If you'd told me three years ago that you were aimin' to grubstake old Shammie Kane," said Goddard, "I'd have told you it was the ac' of a damn fool."

"I know. An' then you stopped me from takin' up the Bar Circle range lease for grass," snapped Dustin. "That cost us over ten thousand. All because you were scared to take a chance."

This time Spike flushed. A man does not care to be reminded of his tinorous moments that cost him money. He stood by his partner, scowling off into the sunset. Joint owners of the Broken Spur, they were as different as black is from red. Sam Dustin's tall little figure, his dark, handsome face, his lawless teeth made a perfect foil for his partner who was, as Jameson, Editor of the Seco Courier said: "As red as a fox and twice as shift."

I wouldn't trust the pair any further'n I'd trust a coyote in a henyard."

The negro cook came out and pounded the supper summons on a big iron triangle that hung on a China-berry tree and the men trooped from the bunk-house to supper but the two partners gave no sign. They continued to stare across the corral at a great red dust-cloud that moved slowly along the distant wire-fence. Under that dust-cloud dim shadows resolved themselves into three packed horses followed by a slouching figure that prodded the rear-most burro with a short goad. At each prod the reluctant burro trotted a few steps but dropped back into a walk. Dustin laughed.

### Laws Of Physics

Intricate Point Is Settled At The University Of Saskatchewan

Laws of physics as operating in the court of Magistrate J. S. McKeasock at Sudbury, Ontario, have no validity in Saskatchewan. In the physics laboratory at the University of Saskatchewan are two suspended leaden balls of equal weight. When one ball swinging slowly is struck by one swinging rapidly in the other direction, it is the slowly-moving ball that bounces back while the one previously in rapid motion becomes almost motionless. An authority of physics points out that if two bodies of differing momentum (weight multiplied by velocity) meet, the resultant momentum will be the same in direction as that of the major force. The majority carries.

### Little Helps For This Week

"Let I pray Thee Thy loving kindness be for my comfort, according to Thy word unto Thy servant." Psalm 119:76.

Love divine has seen and counted Every tear it caused to fall; And the storm which Love appointed Was its choicest gift of all.

That thou couldst dwell in the knowledge and sense of this, even that the Lord beholds thy sufferings with an eye of pity, and is able not only to uphold thee under them, but also to do thee good by them. Therefore grieve not at thy lot, be not discontented, look not at the hardness of thy condition, but when the storms of vexation are sharp look up to Him who can give meekness and patience, can lift up thy head over all, and can cause thy life to grow and be a gain by all. If the Lord God help thee according to thy condition of affliction and distress thou wilt have no cause to complain, but will bless His name.—J. Pennington.

### .. TO HOMES NOT HAVING ELECTRICITY!

"Heard the big ball game this afternoon, Jim—came in clear as a bell too. We haven't electric wiring in our house, but our new Air-Cell radio sounds every bit as good as my cousin's electric set down in the city."

"I used to get into town every time our storage battery ran down. This new radio uses an Air-Cell battery that never needs recharging. I don't mind staying home, though, because our Air-Cell set brings in programs we never heard clearly before."

"That new Air-Cell radio is a wonderful convenience. Our old storage battery was always giving trouble, and half the time we couldn't get the music loud enough. This new set has such an even current that you can hear perfectly all the time."

## EVEREADY RADIO BATTERIES

The invention of the EVEREADY Air-Cell "A" Battery has made possible this entirely different battery-powered radio that gives the glorious full tone hitherto only heard in electric sets.

The EVEREADY Air-Cell "A" Battery lasts for at least 1000 hours, which at 3 hours a day is almost a year's service in the average household, and so does away entirely with the annoyance, expense and loss of time due to frequent recharging.

Used in conjunction with EVEREADY layable "B" Batteries, Air-Cell radios, made by the leading radio set manufacturers, will perform with all the simplicity and reliability of any electric set.

### YEARNING

Have you felt the painful flesh wound  
Of a deep imbedded thorn?  
Do you realize the sorrow  
Earth has known since Time was  
born?

Known the misery, the conflict,  
That injustices will breed?  
Seen thro all the dismal tumult  
Too much suffering indeed?

Could each heart in human pity,  
Full of truth and full of love,  
Only heed each other's footsteps,  
Struggling towards the heights  
above,

We might all climb gradually  
To the upper realms of peace  
Where unselfishness effaces  
Narrowness that seeks release.

And, my friends, when we have risen  
Thro this life's vicissitudes,  
Thro the turmoil and the trouble,  
To the higher altitudes

We'll look back with pained surprise  
To what degree of pettiness  
We allowed our souls to trample,  
Envy! Spite! Ambition! Dress!

O, such little, mean ambitions  
Entering in to motivate  
Kept us from progressing! Matter  
Must aye earthward gravitate.

Only pure, unselfish spirits,  
Rising beyond human ken,  
Can discern the heights we long for  
Where LOVE equalizes men.

Following our aspirations,  
Looking upward with pure eyes,  
We shall see the mortal vanish  
In the dear immortal prize.

### BOAR BONUS POLICY

To encourage and assist the pur-  
chase of boars of good bacon type  
the Dominion and Provincial Govern-  
ments have instituted a bonus policy.  
Under this policy the buyer of a good  
type boar may apply to the Govern-  
ment for a bonus. The boar is in-  
spected and if satisfactory the Dom-  
inion Government refund to the buy-  
er \$5. Then in the spring if the buy-  
er produces a record showing that his  
boar has been mated with 20 or more  
sows belonging to ten or more farm-  
ers the Province will refund the sec-  
ond \$5. In this way the actual cost  
of the boar to the buyer is reduced  
by \$10.

There is a good supply of York-  
shire boars of good bacon type and  
farmers who are interested in this  
policy should get in touch with the  
Department of Agriculture, Vegre-  
ville, or direct to Edmonton.

Five-year Bonds, \$500 and \$1,000

Eight-year Bonds, \$500 and \$1,000

Fifteen-year Bonds, \$100, \$500 and \$1,000

### Cash Subscriptions

All cash subscriptions will be subject to allotment. Following the announcement of the plan of allotment, payment in full for the bonds allotted must be made promptly against delivery of interim certificates, which will be effected on or about 15th October.

### Refunding Subscriptions

Holders of Victory Loan 5½% Bonds due 1st November, 1934, after detaching and retaining the coupon due 1st November next, may, for the period during which the subscription lists are open, tender their bonds in lieu of cash on subscriptions for a like par value of bonds in one or more maturities of the new issue and receive allotment in full with prompt delivery. The surrender value of the Victory 5½% Bonds will be as follows:

100% of their par value on subscriptions for the Two-year 2% Bonds and the Five-year 2½% Bonds.

100% of their par value on subscriptions for the Eight-year 3% Bonds if effected on or before 6th October, and 100% of their par value after that date.

100% of their par value on subscriptions for the Fifteen-year 3½% Bonds if effected on or before 6th October, and 100% of their par value after that date.

Holders will receive in cash the difference between the surrender value of their Victory Bonds and the cost of the bonds of the new issue.

The amount of this Loan is limited to \$250,000,000.

The Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge on the Consolidated Revenue Fund of Canada.

The proceeds of this Loan will retire \$222,216,250 Dominion of Canada 5½% Bonds maturing 1st November, 1934. The balance will be used for the general purposes of the Government, including the redemption of short-term Treasury Bills.

Subscriptions will be received and receipts issued by any branch in Canada of any Chartered Bank and by Recognised Dealers, from whom may be obtained application forms and copies of the official prospectus containing complete details of the Loan. Applications will not be valid on forms other than those printed by the King's Printer.

The subscription lists will open 1st October, 1934, and will close on or before 13th October, 1934, with or without notice, at the discretion of the Minister of Finance.
